Grafana

# What is Grafana?

Grafana is a *multi-platform* open source analytics and interactive visualization web application. It provides:

✓ Charts
✓ Graphs
✓ Alerts

## Visualize

Grafana has a plethora of visualization options to help you understand your data, beautifully

## Alert

Grafana v4.0.2 | Yesterday at 3:52 PM (29KB) ▾

Seamlessly define alerts where it makes sense — while you're in the data

## Unify

Grafana supports dozens of databases, natively. Mix them together in the same Dashboard

## Open Source

Grafana's completely open source, and backed by a vibrant community.

## Extend

Discover hundreds of dashboards and plugins in the official library

# Grafana Features

## Collaborate

Bring everyone together, and share data and dashboards across teams
